

Don't miss this great Seminar @Maui CAP Bldg! IFR Tools/Techniques for VFR Pilots

IFR tools that can be utilized by VFR Pilots. It would clearly be illegal to operate in instrument meteorological conditions without an instrument rating...but, using IFR Tools can make VFR operations both safer and more efficient. We will also review of IFR approach techniques like Controlled Descent Final Approach (CDFA) and ILS crosswind strategy, and how they also apply as good VFR practices.

Directions: Maui CAP Meeting room, outside "the fence" and air conditioned, a great meeting venue.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
